ABOUT ME

Professional focused on Data Analysis with a solid technical foundation in software development. Proficient in SQL for modeling, managing, and querying PostgreSQL databases, and skilled in creating dashboards and reports in Power BI. My previous experience with Node.js and React.js provides me with strong problem-solving skills and agility in learning new tools, such as Python and its analysis libraries. Seeking a challenging position where I can apply my analytical skills to transform data into actionable insights and support strategic decision-making.

EDUCATION

Analysis and Systems Development - Newton Paiva Wyden

January 2023 - February 2026
